FOREWORD

The Eastern Arctic Study is a joint project of the Institute for Local Government and the Centre for Resource Studies, both at Queen's University in Kingston. Funding for the study was provided by the Donner Canadian Foundation.

The purpose of the Eastern Arctic Study was to examine the potential impact of the settlement of land claims of Inuit Tapirisat of Canada, and of constitutional changes in the Northwest Territories (NWT), on both local government and regulation of the mineral industry in the NWT, with special emphasis on the interface between local governments and mining companies. In the course of research on this project, a considerable document collection was accumulated. While this collection by no means constitutes a definitive northern library, it was felt that it would be useful to other researchers interested in government, constitutional change, and resource development in the Canadian north to publish a list of Eastern Arctic Study holdings, along with brief notes on the contents where available. The comments and annotations are the opinions of the Eastern Arctic Study researchers, and do not necessarily represent the views of the Institute of Local Government, the Centre for Resource Studies, or their sponsors.

Agar, C.F.,

Nanisivik - An Arctic Mining Adventure. Presented to the CIMM meeting in Ottawa, April 17-20, 1977, 10 pages.
Brief history of the activities and negotiations which preceded the development of the nanisivik mine.

Agreement-in-Principle Between: The Grand Council of the Crees (of Quebec) and The Northern Quebec Inuit Association, AND: The Government of Quebec and The James Bay Energy Corporation and the James Bay Development Corporation and the Quebec Hydro-Electric Commission (Hydro-Quebec) AND: the Government of Canada, 100 pages, English/ French.
Sets forth the principles which will form the basis of a Final Agreement which will be submitted for incorporation into legislation of the Parliament of Canada and the National Assembly of Quebec. Principles include obligations of the parties involved, surrender and extinguishment of claims and/or rights, citizens rights, federal and provincial programs, changes to the project - Le Complexe La Grande, compensatory works, land, hunting, fishing and trapping, future development, environmental protection, compensation, native development, local and regional government, burial sites and negotiations with other natives of Quebec.

Socio-Economic Impacts of the Nanisivik Mine on North Baffin Region Communities. Report prepared for Nanisivik Mines Ltd., the Government of the Northwest Territories and the Government of Canada, (n.p., November 1979), 428 pages. This study was carried out under the provisions of the Nanisivik development agreement after the mine had been in operation for a few years. The report provides: a profile of the Nanisivik workers; employment record of Inuit workers; wage

income; attitudes toward Nanisivik employment; perceived effects on local communities; reaction of workers and families to Nanisivik employment; effects of employment on traditional sources of livelihood; social costs of rotational employment; conclusions and recommendations.

Canada, Beaufort Sea Environmental Assessment Panel,
The Beaufort Sea Hydrocarbon Production Proposal. Draft Guidelines for the Preparation of an Environmental Impact Statement. Draft. June, 1981. 36 pages.
Outlines the necessary contents of an environmental impact statement. Contents include: an overview of the EIS, background information regarding the proposal, a description of the existing environment, and a comprehensive discussion of all potentially significant physical biological and socio-economic effects. (The enhancement of positive effects and the avoidance, mitigation, and compensation of negative effects should be considered.)

Canada, Beaufort Sea Environmental Assessment Panel,
The Beaufort Sea Hydrocarbon Production Proposal. Summary of Draft (First Version) Environmental Impact Statement Guidelines for Community Use. June 1981, 11 p.
Summary of draft EIS guidelines, intended to help those people in communities most likely to be affected by the production of oil and gas in the Beaufort Sea area, and transportation to market. This report should help community members understand the way government has decided to get public opinion, and to provide an understanding of the first version of the EIS guidelines.

Canada, Commission on Indian Claims,
Commissioner on Indian Claims. A Report: Statements and Submissions, Lloyd Barber, Commissioner. (Ottawa, 1977), 116 pages, English/French.
This report was submitted by the Commissioner on Indian claims whose task it was to review grievances concerning Indian claims. The report contains background material on native people and aboriginal rights, and deals with some specific Indian and Inuit claims. Some possible approaches to, and structures of comprehensive settlements are discussed briefly; English/French.

Canada, Department of Fisheries and Oceans,
Oil, Ice and Climate Change: The Beaufort Sea and the Search for Oil by Allen Milne, (Ottawa, n.d.) 103 p.
Discusses the anticipated effects of an undersea oilwell blowout, or a major spill from a submerged pipeline or tanker ship, in ice-cluttered Arctic waters.

Canada, Department of Fisheries and Oceans,
Crude Oil in Cold Water: The Beaufort Sea and the Search for Oil. by Allen Milne et al. (Ottawa, n.d.), 119 p.
The drift of oil flowing unchecked from an imaginary offshore blowout is traced through the seasons of the year. The oceanography of the Beaufort Sea, and features such as sediments, storm surges and sea ice are described.

Canada, Department of Fisheries and the Environment
Birds and Marine Mammals: The Beaufort Sea and the Search for Oil by Donald A. Blood (Ottawa, 1977), 123 p.
A review of the status, distribution and relationships of birds and mammals in the southeastern Beaufort Sea. Provides a background against which to gauge the potential impact of many future developments and activities in that area.

Canada, Department of Fisheries and the Environment,
Oil Spill Countermeasures: The Beaufort Sea and the Search for Oil by S.L. Ross et al. (Ottawa, 1977) 67 p.
A report on the state of the art in locating, containing and cleaning up oil released in the event of a blowout offshore in the Beaufort Sea. Based primarily on Beaufort Sea Technical Reports and on studies by consultants who were contracted by Fisheries and Environment Canada to examine specific aspects of the problem.

Canada, Department of Indian Affairs and Northern Development,
1979-1980 Annual Report. (Ottawa, 1980), 82 pages.

Canada, Department of Indian Affairs and Northern Development,
An Assessment of the Social, Cultural and Economic Impact of Dome/ Canmar's Drilling Activities, 1977. Submitted by the Social/Economic/Cultural Review Sub-Committee, Jan. 10, 1978, (Ottawa, 1978) 148 p.
Concludes that Dome/Canmar's operations have a net positive effect on the social, cultural and economic aspects of the Beaufort Sea communities. Recommends, among other things, that drilling permits should be approved for several years at a time, subject to an annual review of the social, economic and cultural effect of the operation, and annual approvals after each review should be issued as early in the year as possible.

Canada, Department of Indian Affairs and Northern Development, Canada's Eastern Neighbour: A View on Change in Greenland. (Ottawa, 1976), 103 pages, illustrations.
An overview of changes in Greenland; covers topics such as geography, social conditions, education, housing and the evolution of councils.

Canada, Department of Indian Affairs and Northern Development, Socio-Economic Impact Studies Relating to Pipeline Projects and Certain Northern Development Projects, a bibliography. (Ottawa: January 1977), 27 pages.

Canada, Department of Indian Affairs and Northern Development Socio-Economic Review of the Beaufort Sea Drilling Program 1976-79. Prepared by Terry Foster, Executive Committee Secretariate, GNWT, (Ottawa, 1980) 38 p.
This review of the Beaufort Sea drilling program concludes that unless there is a significant change in Dome/Canmar's drilling program or significant occurrence in the Beaufort Sea area, there is no need for detailed socio-economic reviews; in fact, because of the net positive social and economic effects of Dome/Canmar's program, the company should be encouraged to continue operations in the Beaufort Sea.

Canada, Department of Indian Affairs and Northern Development, Speaking Notes for the Honourable John C. Munro, Minister of Indian Affairs and Northern Development. Standing Committee on Indian Affiars and Northern Development. March 24, 1981, 11 pages.

Presented to the Standing Committee of the House of Commons on Indian Affairs and Northern Development, Ottawa, March 1 and 6, 1973. (Ottawa, 1973), 56 pages.
Statement outlining the objectives of the Dept. of Indian Affairs and Northern Development to establish programs and policies that not only meet the needs of the native peoples and maintain and protect the environment, but which also ensure viable economic development of the north.

Canada, Department of Indian Affairs and Northern Development, Strathcona Sound Project: Progress Report. (Ottawa, June 1980) 37 p.
This report is an update on the functioning of the Nanisivik Mine; presents data on production and ore reserves, financial status, impacts of the mine (e.g., social, economic, environmental), employment and training, infrastructure facilities, government expenditures and recoveries of capital.

Canada, Department of Indian Affairs and Northern Development, Summary of Development in the Soviet North Based on Extracts From the Soviet Press, 1974-75. (Ottawa, 1976), 55 pages, maps.

Summary of activities which are taking place in the Soviet north as recorded in the Soviet press. Includes economic and industrial development, mineral resources and mining, and the oil and gas industry. Extensive use of maps.

Canada, Department of Indian Affairs and Northern Development, Under the Beaufort - Canada Drills in the Arctic. (Ottawa, 1980), 42 pages, illustrations.
A short history/discussion of the development of the Beaufort Sea/Mackenzie Delta area. Short sections on environmental protection, government inspection and views of native people.

Canada, Department of Indian Affairs and Northern Development, Uranium Exploration Continues Strong in NWT With Increased Interest in Gold. Article in Western Miner, February 1981, pp. 60-63.

Canada, Department of Indian Affairs and Northern Development, and Ministry of Transport, Proceedings of the Arctic Transportation Conference, Yellowknife, NWT, December 8-9, 1970, Vol. 2. Co-chairmen: Hon. Jean Chretien and Hon. Don Jamieson. (Ottawa, 1971), 383 pages, maps, charts.
Contains papers presented at the conference. Subject areas include meteorological services, air navigation aids and airport facilities, eastern marine resupply, northern roads, trucking and off-road transportation, western water transportation, (including the effects of building a Mackenzie Valley pipeline), and ice information, marine navigation aids and terminal facilities.

Canada, Department of Indian Affairs and Northern Development, and Ministry of Transport, Proceedings of the Arctic Transportation Conference, Yellowknife, NWT, December 8-9, 1970, Vol. 3. Co-chairmen: Hon. Jean Chretien and Hon. Don Jamieson. (Ottawa, 1971), 370 pages, maps, charts.
Contains papers presented at the conference. Subject areas include people and the environment, transportation facility costs and user charges, northern railroads and solids pipelines, maritime bulk shipping and ice breaker support, and air carrier operations.

Canada, Department of Indian Affairs and Northern Development, and Ministry of Transport, Proceedings of the Arctic Transportation Conference, Yellowknife, NWT, December 8-9, 1970. (Ottawa, 1971), 347 pages.
Proceedings of a conference which provided a forum for discussion about the development of a transportation system in the Arctic: a system which will contribute to orderly social and economic development, while still maintaining the protection of the environment. This volume contains proceedings of the opening, second and final plenary sessions, banquet speeches and a short summary of all papers presented.

Possible Effects of the Arctic Islands Pipeline on Living Resource Use - Preliminary Report, 1977. I.W. Dickson, Study Director Interdisciplinary Systems Ltd.) (Ottawa, 1978), 238 pages.

Examines the use of living resources by twelve Inuit communities in the NWT and the potential effects of the proposed Polar Gas Pipeline on community resource-use patterns. Harvest areas, patterns and statistics are described for the use of furbearers, land mammals, wildfowl, marine mammals and fish by each of these communities and the relative importance of each of these resources to communities for food, income and recreation is discussed.

Canada, Department of Indian Affairs and Northern Development, Northern Pipelines Branch,

Socio-Economic and Environmental Impacts of the Polar Gas Pipeline - Keewatin District. Volume One: Reflections of the People. F.J. Tester, ed. (Ottawa, 1978), 459 pages.

A brief historical background on the Keewatin District. An explanation of the Polar Gas Pipeline Project, and verbatim transcripts of meetings and discussions held in the Keewatin communities of Baker Lake, Chesterfield Inlet, Coral Harbour, Eskimo Point, Rankin Inlet, Repulse Bay and Whale Cove. From these transcripts, issues and concerns are identified, basic attitudes and values are determined important historical and current aspects of Inuit society and culture are noted.

Canada, Department of Indian Affairs and Northern Development, Northern Pipelines Branch,

Socio-Economic and Environmental Impacts of the Polar Gas Pipeline - Keewatin District. Volume Two: Analysis. Frank J. Tester, ed. (Ottawa, 1979), 274 pages.

An assessment of the potential environmental, social and economic impacts of the proposed Polar Gas Pipeline Project on the communities and native people of the Keewatin, if construction of a pipeline through the region were to proceed.

Canada, Department of Indian Affairs and Northern Development, Northern Policy and Program Planning Branch,

North of 60: Prospectus. A prospectus for resource and economic development in the Yukon and the Northwest Territories. (Ottawa, 1973), 119 pages.

Prospectus containing information on resource and economic development in the area North of 60. Includes oil and gas, mines and minerals, municipalities, and territorial government in addition to other subject areas. Complete bibliography is included.

Canada, Department of Indian Affairs and Northern Development, Northern Program Branch,

North of 60: Land Use and Public Policy in Northern Canada. (Ottawa, 1976), 218 pages, maps.

Discussion of issues surrounding public land use policy in the north. Emphasizes that any policy should be a framework within which decisions are made on the basis of the land itself, i.e. the nature, capability and limitations of the land. Indicates that future courses of action should respect issues such as native rights and the evolution of territorial government.

Canada, Department of Indian Affairs and Northern Development, Northern Social Research Division,

The Bankslanders: Economy and Ecology of a Frontier Trapping Community, Vol. 3 The Community. (Ottawa, 1971), 88 pages.

An analysis of the current status and future prospects of the community of Sachs Harbour. The extension of government services and administration to the community, and the controversy surrounding oil exploration are main topics of analysis. Detailed contents and bibliography.

Canada, Federal Environmental Assessment Review Office,
Guidelines for Preparing Initial Environmental Evaluations. Issued by the Chairman of the Environmental Assessment Panel, October, 1976, 182 pages.
Guidelines issued in order to assist initiators in the preparation of Initial Environmental Evaluations.

Canada, Federal Environmental Assessment Review Office,
Report of the Environmental Assessment Panel: Arctic Pilot Project (Northern Component). (Ottawa, 1980), 125 pages, English/French/Inuktitut.
Review of the northern component of the proposal to ship liquefied natural gas from the high Arctic to Eastern Canada. Concludes that the project as presented, is environmentally acceptable, provided certain conditions are met.

Canada, Federal Environmental Assessment Review Office,
Report of the Environmental Assessment Panel: Eastern Arctic Offshore Drilling - South Davis Strait Project. (Ottawa, 1978), 111 pages, English/French/Inuktitut.
Review of a proposal by a consortium of oil companies to conduct exploratory offshore drilling programs in southern Davis Strait. Recommended that the project proceed as proposed under certain conditions outlined in the report. Proposal involves exploratory drilling, only.

Canada, Federal Environmental Assessment Review Office,
Report of the Environmental Assessment Panel: Lancaster Sound Drilling. (Ottawa, 1979), 127 pages, English/French/Inuktitut.
Review of the proposal by Norlands Petroleums Limited to explore for hydrocarbons in Lancaster Sound; concluded that an ultra-conservative approach to drilling must be taken, particularly since this proposal represents the initial drilling venture in the area. A much broader review is required of the present and future uses of Lancaster Sound.

Canadian Arctic Producers Limited,

We Don't Live in Snow Houses Now - Reflections of Arctic Bay, n.p., n.d., 192 pages, illustrations.

Arctic Bay, located in the High Arctic has become a focal point for industrial development in recent years - this has had a great impact on the Inuit population of that area. Through a series of personal interviews conducted with native people, the history of the transformation of the High Arctic is related, as experienced by its native inhabitants.

Canadian Arctic Resources Committee,

Lancaster Sound: Issues and Responsibilities. Report on the Environmental Science Workshop for the Lancaster Sound Region, Kananaskis, Alberta, 6-8 November 1979. Edited by E.F. Roots. (Ottawa, 1980), 110 pages.

Issues and responsibilities surrounding the debate concerning development of the Lancaster Sound region. General principles for responsible decision-making in the development of the region are defined; the biological importance of the region is discussed; industrial development proposals for the region are reviewed; the current state of scientific knowledge of the region is presented; areas where the northern decision-making regulatory system is thought to be either structurally at fault, or self-defeating were identified; and suggestions and recommendations are outlined. Conclusion was that there is a need for a basic change in Canadian policy and management orientation concerning the north.

Central Arctic Area Council,

Regional Council Conference, Central Arctic Region, Spence Bay. (NWT, January 10, 1978), 7 pages.
Representatives from the Canadian Arctic Co-operative Federation Ltd., the Féderation des Co-opératives du Nouveau Québec, Makivik Corporation, the Dene Nation and Inuit Tungaringa Nunamini discussed the origins of the co-op movement and problems of northern development. Specific concerns included the roles of co-operatives and development corporations in northern development, the effect of land claims and development corporations on the co-ops and on the Inuit and Dene way of life, and the problem of co-ops and corporations co-existing and working together on economic development. At the conclusion of the conference, the delegates decided upon 10 resolutions which represented the decisions of the conference.

Report of the Special Committee on Unity to the 3rd Session of the 9th Assembly at Frobisher Bay, October 22, 1980, and Recommendations as Amended to the Report of the Special Committee on Unity, 16 pages.
Recommendations of the Special Committee on Unity which was mandated 'to try to determine the means by which a political concensus might be generated amongst the people of the NWT and to make recommendations concerning this matter to the Assembly'. (Amended) recommendations were passed by the GNWT Territorial Assembly, Frobisher Bay, October, 1980.

Government of the Northwest Territories
Socio-Economic Impact of the Beaufort Sea Drilling Program, 1978. 1978, 20 p. plus appendices.
This review concludes, among other things, that Dome/Canmar has abided by the Memorandum of Understanding signed by the Company and the Government of Canada; that the quality, stability and skills of the northern workforce improved in 1978; that there are significant economic spinoffs from the drilling program expenditures; that the number of hunters and trappers from 1975-76 to 1977-78 has not changed significantly; and that the BSCAC is an effective mechanism for forwarding information from the company to the community level, but not in forwarding community interests to the company. Recommends that the Memorandum of Understanding be renewed to cover the 1979 and 1980 drilling seasons.

Government of The Northwest Territories,
Summary of the Education Ordinance for the Northwest Territories, Bill 7-59. 13 pages.

Gulf Canada Resources Inc. Development of Socio-Economic Principles and Practices. (Study Two - Volume I - The Government's Socio-Economic Regulatory Requirements, Practices and Trends). Prepared by Cornerstone Planning Group Limited, May 1980, 74 p.
A document which is intended to alert Gulf Canada's senior executive, management and staff, to issues, concerns and likely trends in the socio-economic impact assessment process from the perspective of the government. Provides an overview of the government regulating process as it relates to socio-economic impact assessment; evaluates the issues affecting the identification and prediction of impacts; identifies significant issues & areas of concern to government, the public, the company, and industry in general; and provides some government observations on the potential uses of the socio-economic impact assessment process by resource companies.

Gulf Canada Resources Inc. Development of Socio-Economic Principles and Practices. (Study Two - Volume II- The Government's Socio-Economic Regulatory Requirements, Appendices). Prepared by Cornerstone Planning Group Limited, May 1980, 57 p.
Appendices, which provide a concise description of the regulating requirements in various Canadian and American jurisdictions visited as part of this study. Discusses relevant resource developments, regulating framework, the socio-economic impact assessment process, requirements for public involvement and public hearings, phasing and time frame, future trends and issues, and pertinent documentation, for each jurisdiction.

Gulf Canada Resources Inc.
Development of Socio-Economic Principles and Practices. (Study Three - The Resource Sector's Socio-Economic Practices and Trends.) Prepared by Cornerstone Planning Group Limited, May 1980, 95 p.
Outlines the socio-economic practices and trends of the resource sector in Canada and the United States; assesses the current situation and anticipated trends in the socio-economic impact assessment process from the viewpoint of representatives of energy companies, consultants and a variety of interest groups.

Gulf Canada Resources Inc.
Development of Socio-Economic Principles and Practices. Summary and Recommendations. Prepared by Cornerstone Planning Group Limited, May 1980, 69 p.
Presents fifteen recommendations for overall socio-economic principles, as well as detailed findings and recommendations, which are the socioeconomic practices required to support each of the principles.

Gulf Canada Resources Inc.
Native Affairs Program: Employment Participation Guidelines, May 1981. 19 p.
Outlines objectives and targets of the native employment program as well as strategies and implementation measures in the areas of contractor employees, information regarding opportunities, recruiting and hiring, education and training, orientation and counselling, transportation, and job structure.

Hamelin, Louis-Edmond,
Canadian Nordicity: It's Your North, Too. Translated from the French by William Barr. (Montreal: Harvest House, 1979), pp. xv plus 371.
General review of northern status and development, with respect to geographic, political and economic features. Part I defines 'nordicity' and describes the north in a variety of dimensions. Part II describes the federal government's dominance, the emerging territorial status, and the 'new deal' in Nouveau-Quebec. Part III deals with underdevelopment among natives and the history of big business in the territories. Concluding chapter advocates more knowledge of and concern for northern viewpoint in the south. Extensive footnotes with reference to published and unpublished material. Glossary of northern terms. Appendix containing chronology of political and administrative events. Bibliography, index.

Loken, Olav H.,
Report of the Task Force on Beaufort Sea Developments. Submitted to the Senior Policy Committee, Northern Development Projects, by Olav. H. Loken, April, 1981, 137 pages.
Draft of the report of the task force on Beaufort Sea Developments which was established to examine how the federal government could best respond to the anticipated hydrocarbon developments in the Beaufort Sea area. Contains a summary of the current status, as seen from a government and industry perspective, and underlines the lack of a current, comprehensive and clearly communicated northern development policy, and the need for clarification of its linkages with the National Energy Program. Expresses concern over the availability of technical and scientific expertise within government to support the regulatory function, and the need for a more careful examination and broader understanding of the assessment of hydrocarbon resources, and the timing of development.

Lotz, Jim,
Northern Realities - The Future of Northern Development in Canada. (Toronto, 1972), 355 pages.
Descripton of Canada's north, particularly the Yukon, with respect to physical environment, historical background, constitutional and political dimensions, resource base and economy, and social structure. Discusses various aspects of northern development and then concludes with a look at the future of the Yukon Territory.

Makivik Corporation,
Position of the Inuit of Quebec with Respect to the Implementation of the James Bay and Northern Quebec Agreement. Brief to the Standing Committee on Indian Affairs and Northern Development. Submitted by Makivik Corp. on behalf of the Inuit of Quebec. (Quebec, March 20, 1981), 78 pages.

Queen's University, Centre for International Relations,
Interest Groups in the North, a collection of term papers prepared by graduate students at Queen's University, under the guidance of Nils Orvik and Alfred Zariwny. (Kingston, 1977), 171 pages.

A collection of term papers prepared by graduate students at Queen's University. Interest groups studied are the Inuit Tapirisat of Canada, the Canadian Arctic Resources Committee, Panarctic Oils, Canadian Gas Arctic Study Ltd., and Pollution Probe. Variables covered in the papers include origin, goals and objectives, range of membership, organizational structure, sources of income, range of activities, publications, relationships with other groups and ideological orientation.

Queen's University, Centre for International Relations,
Interest Groups in the Northern Territories. (Kingston, 1977), 358 pages, maps.
A collection of papers produced during a study of interest groups in the northern territories. Covers both native and non-native groups. Non-native groups include the business community, municipal associations, labour unions, women's groups, co-ops, agricultural and industrial groups, environmental and private charitable organizations. Native groups include both Indian and Inuit groups.

Queen's University, Centre for International Relations,
Northern Canada Bibliography, by Peter Clancy. Draft. (Kingston, October 1978), 99 pages.

Queen's University, Centre for International Relations,
The North in Transition, Nils Orvik, editor. (Kingston, 1973), 168 pages.
A collection of papers, written by graduate students, which attempt to sort out some of the problems relevant to northern development. Topics included are: a theory of northern development, a northern model for education of native peoples in the NWT, the co-op movement, development of local government in the Northwest Territories, federal commissions, and home rule in the international north. Bibliography included for each paper.

Queen's University, Centre for International Relations,
The Relevance of Native Culture to Northern Development: The Greenland Case, Northern Study series no. 4/76. (Kingston, 1976), 68 pages.
Author attempts to draw up a co-ordinated picture of Greenlandic society in the decades to come, by formulating a prospective cultural policy, together with a set of commentaries in which the policy in question is viewed in relation to actual conditions and realistic prospects for the future. Makes basic recommendations as to basic structure, language policy, policies of media, book publishing policy, art support policy, educational, church and social policies.

Queen's University, Dept. of Political Studies,
Policies of Northern Development, Nils Orvik, editor. (Kingston, 1973), 241 pages, charts, graphs, maps.
A collection of papers, regarding the political and administrative aspects of northern development, and emphasizing the controversial character of the distribution of power and responsibility in the North. Circumpolar perspective.

Recognition of the Dene Nation Through Dene Government, (n.p., March 15, 1979), 13 pages.

Richardson, Boyce,
James Bay, the Plot to Drown the North Woods. (Sierra Club, 1972), 190 pages.
This book describes the inception of the James Bay Project noting the inadequacy of economic and environmental studies and the absence of consultation with the natives in the area. It places the development project in a context which includes federal-provincial antagonism and provincial determination to exert the authority over the northern part of the province. The book was written before negotiations leading to the James Bay Agreement were underway and focuses instead on the threat to the lifestyle of the James Bay Cree.

Richardson, Boyce,
Lessons from the James Bay Settlement. Dene Rights, Vol. VII, Paper 3, (n.p., n.d.) pages 37-56.

Richardson, Boyce,
Strangers Devour the Land. (Toronto, 1975), 337 pages.
Account of the conflict between the Cree of northern Quebec and the James Bay Development Corporation's project involving the building of a series of gigantic dams and reservoirs at the base of Hudson Bay. Describes the conflict between cultures and between opposing lawyers, scientists and statisticians.

Rudnicki, Walter,
Canada Funded Development Systems: First Phase Report, prepared for the Department of Indian and Northern Affairs. (Ottawa, 1979), 207 pages.
A study of the native people of northern Canada and Quebec, focusing on development systems which have emerged as a result of land claims settlements in northern Quebec. Examines the emerging relationship between an established co-operative movement and the newer corporate structures, with reference to corporate structures developed as a result of the Alaska Native Claims Settlement Act. Alternative ways of approaching the development needs and aspirations of native people are tentatively mapped out.

Summary of the Report: Baker Lake, N.W.T., A Background Report of its Social and Economic Development. Published by the Polar Gas Project, January, 1977. 65 p., maps.
This study was undertaken for the Settlement Council of Baker Lake and the Polar Gas Project and was funded by the Polar Gas Project. Its purpose was to undertake a survey of the social and economic development of Baker Lake that could provide the background against which the planning of a

natural gas pipeline from the High Arctic gas fields to southern markets might be considered. Through description and presentation of questionnaire and interview responses in tabular form, the report provides an overview of the economic, social and cultural life of Baker Lake.

Strathcona Mineral Services Limited,
Comments on Principal Recommendations on BRIA Socio-Economic Impact Study of Nanisivik. (Toronto, Jan. 9, 1981), 9 p.
Response of Strathcona Mineral Services Ltd. to recommendations of the BRIA Study of the Socio-economic impacts of the Nanisivik Mine. SMSL believes that the study correctly concludes that the effect of the Nanisivik project has been beneficial to the North Baffin Region, but is disappointed that the study did not produce more data on which these benefits could be expanded. It is noted that SMSL would have preferred to have had the study done by an independent, professionally qualified organization, other than a politically oriented group such as BRIA, which provided an inherent conflict of interest.

The Polaris Mine,
Memorandum of Understanding Dated the 12th Day of August, 1981, Between Cominco Ltd. and the Government of the Northwest Territories Respecting the Socio-Economic Action Plan for the Polaris Mine, Little Cornwallis Island, N.W.T.

Thompson, Andrew, R.
Native Land Claims and Mineral Resource Implications. Dene Rights, Vol. VI, Paper 3, (n.p., n.d.), pages 33-60.
An examination of the implications of land claims upon control of mineral resources; the author states that benefits flowing from the ability to control natural resource developments are equally as important as financial benefits derived from taxes, royalties, etc. Therefore, settlement of land claims must be achieved prior to the approval of natural resource developments.

THE INSTITUTE OF LOCAL GOVERNMENT

The Institute of Local Government, Queen's University, was founded in 1944 to provide a focus for educational and research activities related to municipal government in Canada. It is part of the School of Graduate Studies and Research at Queen's University. Katherine A. Graham is Director of the Institute.

Within this broad mandate, the Institute has devoted itself to the continuing education of municipal officials, to the provision of advice to municipal officials and others dealing with various problems related to urbanization, local government politics, organization and management. Its research program has spanned eight broad areas of interest:

- studies of municipal institutions;
- the municipal political process;
- management in local government;
- local government in remote and rural areas;
- comparative local government;
- local government in the intergovernmental arena;
- the history of local government;
- urbanization and its effects.

The Institute welcomes comments on its publications, proposals for research projects, or enquiries about any aspect of its work.

THE CENTRE FOR RESOURCE STUDIES

The Centre for Resource Studies (CRS) was established in 1973, under the sponsorship of Queen's University, the federal Department of Energy, Mines and Resources, and The Mining Association of Canada, to carry out a program of research and publication on mineral policy issues.

The Centre provides opportunities for multidisciplinary research in resource studies at Canadian universities, furnishes reliable information on matters related to mineral resource policy, and promotes closer liaison between government, industry and other concerned groups. The research program is carried out both at the Centre and by means of contracts with qualified investigators, usually at Canadian universities. Small exploratory studies are also funded, through a system of grants-in-aid of research. CRS Seminars involve representatives from governments, industry, universities, labour, and other interested groups in working sessions on issues of current concern. Through this program of research and seminars, and the resulting publications, the Centre contributes to informed discussions and a better understanding of significant issues.

The Centre is governed by a board of directors which establishes general policy and priorities for research. The board has sixteen members, appointed by Queen's University, The Mining Association of Canada, and the federal government. Guidance on the research program, together with discussion of policy issues and other matters, is provided by the Advisory Council. This body comprises all researchers associated with the Centre, together with members appointed from such groups as governments, industry, labour, and other interests. A Research Advisory Committee aids in the development of projects and the selection of research proposals. The executive director and staff are responsible for the work of the Centre within this framework.

Most of the funding for the Centre's activities is provided by the sponsors. In addition, the Centre accepts contracts from other organizations interested in mineral policy research.

The Centre welcomes comments on its publications, proposals for research projects or for publication, or enquiries about any aspect of its work. For further information, contact:

EASTERN ARCTIC STUDY

The Centre for Resource Studies and the Institute of Local Government, both of Queen's University in Kingston, Ontario, are undertaking a study of the ways in which the land claim of the Inuit Tapirisat of Canada (ITC) may affect local government and mineral development in the Northwest Territories (NWT). Financial support for the study is being provided by an independent agency, the Donner Canadian Foundation. Advisory support is being provided by the ITC, the the federal government, the Government of the Northwest Territories, and many other agencies, companies and interested groups.

The objectives of the Eastern Arctic Study include the following:

1. to study the potential impact of the settlement of ITC land claims, and of constitutional development in the NWT, on local government in the ITC area;

2. to study the potential impact of these changes on mineral development (including both petroleum and mining) in the ITC claim area.

3. to present the results of this research in a manner which will permit its use by northerners and other interested parties to anticipate possible difficulties and mitigate their effects.

Local government is extremely important to the residents of the Northwest Territories, because local councils and committees provide services that are basic to everyday needs. In addition, a community's local government can often act as the interpreter and advocate of peoples' interests and needs.

We expect the land claim negotintions to result in two related outcomes.

i Local governments will be given increased responsibilities in the land claim area. Some changes are already in progress, chiefly through the initiative of the communities themselves and of the Government of the Northwest Territories. ITC also supports stong local government. The phrase 'local government' refers to any governing authority established below the territorial level. It could include, for example, regional governments as well as hamlet or settlement councils and their committees.

ii There will be a significant increase in the degree of influence exerted by local governments, and by native institutions such as development corporations and cooperatives, on resource planning and the mineral development process.

Thus we expect the settlement of claims to affect significantly the climate for mineral development in the NWT. Native people will have strengthened local governments and an expanded role in planning the nature and direction of resource development.

The possibilities for mineral development in the ITC claim area are substantial, and the future of resource development in this region has implications for the welfare of all northerners, and for all Canada. It is therefore important that all parties to the negotiating process understand the possible consequences of their decisions and actions. The purpose of this study is to contribute to that understanding.

During the study, researchers will be visiting communities in the north. We hope to meet members of the councils and other residents, and to observe the present operation of local governments and native organizations. We will also discuss the ways in which existing mineral developments and government regulatory bodies have interacted with these communities in the past.

The researchers working on the Eastern Arctic Study are Katherine Graham, George Miller, Anne McAllister, Margot Wojciechowski and Sharon Brown.
